

➤ Preprint fact checking

Scoop protection

Preprints allow you to establish priority for your discoveries. 99.3% of preprint authors reported no scoop problems.¹

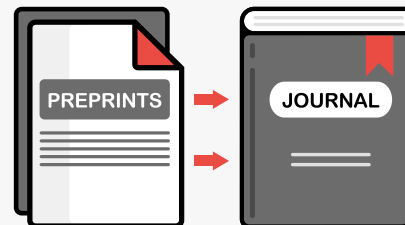

Preprints are journal compatible

Over 1,200 journals operate policies compatible with preprints.²

Preprints are good quality

Two thirds of bioRxiv preprints appear in a journal within two years.³ Quality of reporting is within a similar range as that of peer-reviewed articles.⁴

Smoother path to publication

Many journals allow preprint transfers directly from servers.¹ Some editors scout preprints and invite submissions to their journal.
